

Prompts para Terra das Cinzas

Pacote completo de arte em pixel art para o RPG: abertura, herói, equipamentos, habilidades, inimigos, chefes, regiões, interface, multiplayer e mercado com wallet.

Como usar

Todos os prompts estão em inglês (os modelos respondem melhor) e já trazem a paleta cinza e brasa do jogo. Os que geram sprites pedem fundo magenta sólido (#FF00FF) para remover depois. Geradores não respeitam pixels exatos: gere maior, reduza com nearest neighbor e fatie em grade (veja os PDFs anteriores de tiles, assets e spritesheets, que têm as ferramentas e o script de recorte).

Bloco de estilo (cole em todos os prompts)

Para manter tudo com a mesma cara, reaproveite sempre este trecho. Se a ferramenta aceitar imagem de referência, use um asset aprovado como base.

ashen dark fantasy palette (charcoal, ash gray, ember orange, mossy green accents), limited palette of 8-12 colors, crisp hard pixel edges, no anti-aliasing, 1px dark outline, light from top-left, 16-bit style

Negative prompt

blurry, anti-aliasing, gradients, 3D render, realistic, soft shadows, perspective distortion, text, watermark, extra limbs, inconsistent style, noise

Dica sobre texto e logos

Geradores erram letras. Peça sempre arte sem texto e escreva o nome do jogo e os botões depois, com uma fonte pixel no editor ou no próprio código. O mesmo vale para logos de terceiros (Solana, Phantom etc.): não peça para o gerador desenhar, use os arquivos oficiais do kit de marca de cada um, respeitando as regras de uso.

Ordem sugerida de produção

1. Bloco de estilo e tela de abertura (define a identidade).
2. Herói com retrato e spritesheet de caminhada.
3. UI: inventário, barra de habilidades, botões e barras.
4. Equipamentos, ícones de habilidades e molduras de raridade.
5. Inimigos e tileset da Região 01, depois o chefe.
6. UI de mercado e wallet, moedas, selos on-chain e estados de transação.
7. Demais regiões, masmorras, estruturas e cosméticos.
